Professional Summary

 Full Stack Developer | AWS | Docker 

Full Stack Software Engineer with 3.5+ years of experience developing, deploying, and scaling web applications using the MERN stack. Proficient in AWS, Kubernetes, and Docker, with a strong foundation in DevOps and infrastructure automation. Adept at leading full software development life cycles, optimizing performance, and delivering secure, maintainable solutions. Known for crafting clean, responsive, and user-friendly interfaces with strong HTML/CSS and modern UI frameworks.

Skills

- Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, NestJS, NextJS
- DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD
- Databases: MongoDB, PostgreSQL, MySQL
- Tools & Platforms: Git, GitHub, Nginx, PM2, Postman, VS Code
- Concepts: REST APIs, Microservices, WebSocket, Authentication (JWT/OAuth), Agile/Scrum
- Soft Skills: Problem-solving, Team collaboration, Project management
- Dev Practices & Tools: Agile/Scrum, Jira, GitHub Actions, Docker Compose, PM2, Jest, Swagger/OpenAPI

Professional Experience

Inara Consultancy Services – Ahmedabad, India

- Senior Software Engineer | Mar 2025 – Present
- Spearheading the design and deployment of distributed systems with AWS, Kubernetes, and Docker.
- Leading DevOps practices across multiple projects ensuring CI/CD pipelines and auto-scaling.

- Mentoring junior engineers and managing full-stack development in MERN applications.

- Software Engineer | Apr 2023 – Mar 2024

- Developed scalable backend APIs using Node.js, Express, and MongoDB.
- Integrated third-party services and managed deployment pipelines via GitHub Actions and AWS.
- Implemented role-based authentication, improved API performance by 25%

- Junior Software Engineer | Dec 2021 – Apr 2023

- Contributed to multiple client projects building UI components in React.
- Wrote modular backend services using RESTful APIs and optimized DB queries.
- Participated in code reviews, testing, and documentation.

Projects

- Wave Bites – Food Delivery Platform

Full Stack Developer | React, Node.js, GraphQL, MongoDB, Stripe, WebSocket

- Built a scalable full-stack application for food ordering and delivery with real-time order tracking.
- Integrated GraphQL APIs, Stripe payments, and WebSocket for live order updates.
- Designed UI in React and implemented robust backend services using Node.js.

- Revolt Podcast Platform

Developer & Full Stack Contributor | PHP, JavaScript, HTML, CSS, MERN Stack

- Created a podcast website in PHP and JavaScript.
- Built the admin panel and backend API using MERN stack for content management.
- Enhanced podcast publishing workflows and improved performance.

- Wave Diver – Driver Management System

Backend Developer | Express.js, Kafka, MongoDB

- Designed and implemented backend services for managing delivery drivers.
- Used Kafka for asynchronous event processing and MongoDB for storage.
- Optimized performance for real-time task assignment and tracking.

- CommissionCrowd Platform Migration

Full Stack Engineer | NestJS, Next.js, React, PostgreSQL, Django (legacy)

- Led the migration of a production platform from Django + MySQL to MERN + PostgreSQL
- Rebuilt core systems including:
 - CC API (NestJS): Scalable REST API for core platform logic
 - CC App (React): Main user-facing dashboard
 - CC Website (Next.js): SEO-optimized landing and marketing site
 - CC Admin (Next.js): Admin control panel for internal users
 - CC Blog (Next.js + TinaCMS): Migrated legacy blog to JAMstack with SEO restoration
- Contributed across the full stack and led backend architecture on CC API and CC App
- *Currently an active contributor and full-time engineer on CommissionCrowd Platform*

Education

B.Tech, Computer Science

Institute of Technology & Management, Gorakhpur (2012 – 2015)

Grade: 61%

Diploma, Computer Science & Engineering

MP Polytechnic, Gorakhpur (2009 – 2012)

Grade: 70%

Certifications

- JavaScript – The Complete Guide, Udemy | Issued Jul 2021
- HTML and CSS, Udemy | Issued Feb 2021
- React – The Complete Guide (Hooks, React Router, Redux), Udemy | Issued Sep 2020

Preferred Roles & Job Type

Open to: Full Stack · DevOps · React · JavaScript Engineering roles

Availability: Full-time | Remote · Hybrid · On-site (Delhi, Ahmedabad, Lucknow, Gorakhpur)
